Executive Summary

Result oriented Delivery Lead, coach and mentor with 25 years of experience in Agile Digital Transformation programs, managing scrum teams, delivery / program management, end to end software development and testing.

Broad industry experience in organizations including **Wipro (Nokia Networks, Cisco, Motorola, Alcatel Lucent, Tellabs)**, across geographies (**US, Canada, Finland, UK, Germany**). Rich experience in managing geographically distributed teams, customer management, executing concurrent projects, delivering large strategic programs with strong governance. Managing \$10+ M portfolio of team size 200+ members, distributed across globe. Strong ability to lead Digital Transformation program delivery, roadmap and building high performance teams, client relationship, setting up new accounts / projects from scratch, project transition, anchoring new proposals.

Key successes – Digital Transformation Execution, transitioned complex telecom account from Germany, setup teams in different technologies within short period, Turnaround in customer satisfaction.

Competence and Skills

- Leadership and building winning team
- Agile Transformation Program Delivery
- Project Transition of Large and Complex Programs
- Stakeholder Management
- Program Management
- Accountable for P&L

Awards & Recognition

- **Best Project Execution Award** in E R&D Division during Nov 2021
- **'Team Excellence Award'** from GMT BU in Wipro for Turnaround in delivery and CSAT in Nokia account in FY 2014- 15.
- **'Excellence Award'** from Global Media and Telecom (GMT) BU in Wipro, for achieving the best results by Nokia account in FY 2013-14.
- **'Award for Best Result'** for achieving Best Results in Mega/Gama Accounts
- **'Award from Nokia'** for Best Contribution for their Radio Access Network Application Development
- Certificate for Successful Lean Implementation - **Lean Practitioner**

Program / Delivery Management

- Oversaw management, performance, execution of major account programs, multiple agile work streams, 3rd party vendor management, ensuring profitability, managing program budget and operating margins, and integrating quality customer service.
- Directed all program phases, from inception through completion, including scoping / backlog, planning, delivering agile epics, test, and post production support.
- Coordinated and prepared proposals, as well as established and monitored master plans and schedules.
- Led design, development and testing agile teams, including facilitating team meetings, tracking action items, and guiding production product launches.
- Met with customers to determine needs and requirements and monitored operations to ensure compliance.
- Conducted risk assessments, identifying dependencies and made recommendations for improvement, collaborating with senior leadership to develop process, coaching agile teams and program changes.
- Producing and timely reporting program status dashboard to all the stakeholders
- Consistently achieved Customer Satisfaction Score of 6.5 and 7 out of 7

Key Project

Digital Automated Customer Engineering – DevOps Application

As a **Agile Program Manager** implemented one of the DevOps Automation Platform for one of the biggest Telecom Product Vendor. It helped to standardize the Service Delivery of several hundreds of projects using common development platform, CI/CD, Automation Testing and package delivery to the end customer. Lead end to end Agile lifecycle model. The project provided host of benefits including standardization of the process, program metrics, reusable components, zero touch provisioning for service delivery portfolio.

Transformational Functionalities:

- Helps to standardize the development lifecycle using DevOps Guidelines. It provides established blueprints to help in a) Creating new project environment (Jira, Eclipse Che, Git), b) Tracking (Stories, Test Metrics), c) Continuous Integration (Jenkin build setup with nightly build setup and automated regression testing), d) Deploying package to edge node – for customer delivery e) workflow implementation through Camunda
- Zero touch automation is facilitated at customer sites, there by reducing service delivery timelines
- Reusable blueprints are created for the solutions, which serves as one step configuration for all the tools

Key Benefits:

- **Increased Collaboration:** Distributed team can share and reuse the standardized artifacts
- **Reusable Components:** Reusable components make development environment setup process easier across programs
- **Zero Touch Deployment:** Through automation of precheck configuration, installation and deployment.
- **Reduced Development Lifecycle:** Zero touch provisioning to setup development environment, automated test setup and metrics collection

Key Achievements:

- More than 500 projects onboarded through this platform.
- Standardized Development Environment and Metrics Collection across the organization
- Reduced **development setup time by 50%** across all projects
- Helped to standardize the metrics, global view for the Senior Management

Technologies Used:

- **DevOps** – Jenkins, Jira, Eclipse Che, Git/Gerrit, Jfrog, Camunda, Keycloak
- **Platform:** Kubernetes based Cloud Platform, Micro Service Based Deployment Architecture
- **Development:** Springboot, ReactJS

Experience Summary

Key Projects Delivered:

- Development of Radio Access Network Mobile Base Station Transport Functionalities for Leading Mobile Equipment Manufacturer
- Lead **recovery program** of **Business Process Management** (BPM) tool development for a global Telecom Vendor which involved transformation functionalities including automation of workflow using PEGA, Field Force Automation through Mobile Application.
- As a Delivery Manager lead a team of 200 Plus member working on various Telcom Applications to implement various functionalities in Network Management Application
- Successfully **transitioned** a 125 plus member program from Germany to India – setting up both development and lab environment and leading its delivery for several years
- Lead implementation of Adapters for Multi Vendor Routing Equipment Integration on to Nokia Service Platform, that helped several Telecom Service Provider to seamlessly use heterogenous equipment's under single Network Management Service Platform.
- Lead a team of 40 members to develop **Next Generation Network Management Platform** that helped to build scale and performance for Optical Network in Telecom

Business Goals Delivery:

- **Increasing the Revenue** from \$7 Million to \$ 10+ million per annum as part of Delivery Manager Role by proactive proposals, delivery lead growth, spotting Change Request opportunities and building strong customer relationships.
- **Improved the Operating Margin** from 27% to 35% by utilizing several leavers like Automation, Rookie, Bulge Management and Offshore-onsite mix, Lean Implementation.
- Achieved Customer Satisfaction Score of 6.5 or higher (out of 7) consistently for several years
- Nurtured Talent, built offshore-onsite talents, developed **Competency Management Framework** to handle attritions and knowledge retention

Certifications:

- Microsoft Certified Azure Fundamentals – Microsoft – July 2022
- **SAFe Agilist Certification** from Scaled Agile Inc - November 2018
- Adapt – Wipro Certification for Digital Delivery – Oct 2017
- Sun Certified Java Developer - November 2002

Work Experience:

Organization	Designation	Duration
Wipro Technologies	Sr Delivery Manager	September 1998 to present
BPL Telecom	Sr Software Engineer	Jul 1995 to September 1998
